

RA Worksheet Report

Cybersecurity Assessment of the Industrial Control Systems (ICS)

Cybersecurity Assessment of the Industrial Control Systems (ICS)

Date: 2023-08-14

Business Unit: The Factory

Scenarios

[illegible]

Attack on the integrity of inventory optimization systems		
Attack on the integrity of inventory optimization systems		
Attack on the integrity of inventory optimization systems		
Attack on the integrity of inventory optimization systems		
Physical intrusion into the ICS facility compromising system integrity and potentially disrupting critical processes.		
Physical intrusion into the ICS facility compromising system integrity and potentially disrupting critical processes.		
Physical intrusion into the ICS facility compromising system integrity and potentially disrupting critical processes.		
Physical intrusion into the ICS facility compromising system integrity and potentially disrupting critical processes.		
Physical intrusion into the ICS facility compromising system integrity and potentially disrupting critical processes.
